On 11 March 1955, a conference on the Hohensaaten construction project was held at the QNA Berlin. Main topic of the conference was the completion of the tanks.

Senior Lieutenant Isalis, representative of the administration Fuel and Lubricants, requested a capacity of the installation of 15,000 tons by the end of 1955. During the conference, Senior Lieutenant Kräger was mentioned as commanding officer of the KVP unit stationed in Hohensaaten.

Comment. The scheduled capacity exceeds by far previous assumptions, but appears probably with regard to the extension of the installation which covers more than 3 square kilometers.

Available Soviet fuel depots cover the following areas:

Velten 0.4 kilometers, square, ~~square~~
Möckern 0.3 square kilometers and ~~square~~
Schleife 1.5 square kilometers.
